

## Active Directory: Adding a Workstation To The New Domain

---

1. Check to see if the workstation is already on the correct domain.
  - a. Right-Click on “*My Computer*”
  - b. Select *Properties*
  - c. Click on the *Network Identification* tab.
  - d. It should be in the eu.ds.dodea.edu domain.
  - e. If this is the case, click the *Cancel* button and move on.

2. Add the workstation to the correct domain.
  - a. Click *Properties* button
  - b. Change the name of the domain by typing in the correct domain: eu.ds.dodea.edu
  - c. Click the *OK* button.
  - d. It will ask you to authenticate in order to change the information on the domain.
  - e. Hint: Don't try to change the computer name AND the domain at the same time.
