

Internet Explorer: How to Save Your Internet Favorites:

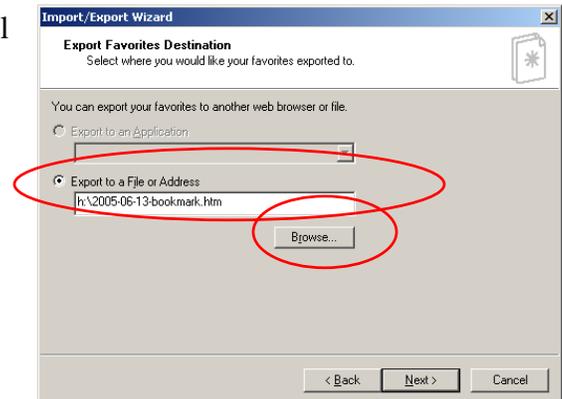

1. Start Internet Explorer
2. Click on the *File* menu item and select *Import and Export* - this takes you to the wizard.
3. Click *Next*
4. Select *Export favorites* and click *Next*

5. The *Favorites* folder will be highlighted. Click *Next*

6. *Export to a File or Address* will be checked. This will show you know where it will export your Favorites.
7. Click *Browse*
8. Use the drop down menu to locate your **H** drive if it is not already showing (this is the one with your user name).

9. Click the *Save* button. I suggest using something to indicate the date.
10. Your favorites are now backed up to a file in your H:\drive. In this example, the file is called **H:\2005-06-13-bookmark.htm**
11. *Next*
12. *Finish*
13. *OK*
